# Every surface in the project, *from one source*

This catalogue is the complete tile offer at V° LIVING. It brings together three Italian manufacturers under one set of pages so that a floor, a wall, a wet area and a terrace can be specified in a single sitting.

Products are arranged by effect rather than by brand, because that is how a room is specified. Inside each effect the collections stay under their own manufacturer name, with the official product names, formats and codes exactly as the maker publishes them.

Where a manufacturer does not publish a code for a product, the code field is left empty. Nothing in this catalogue has been renamed or invented.

THICKNESSES

# Reading a *collection page*

- 01 **Collection** — the manufacturer's official collection name, set in the display serif at the head of the page.
- 02 **Colour or finish name** — printed under each swatch in small capitals. This is the name to quote when ordering.
- 03 **Code** — the manufacturer SKU where one is published. Alfalux publishes a code per size; the first is shown, with the number of further sizes after it. Flaviker and Surface Design do not publish a public code, so this line is left empty.
- 04 **Spec bar** — material, finishes, sizes in centimetres and thicknesses, taken from the manufacturer's own technical data.

## SURFACES AND FINISHES

R11 marks an anti-slip surface for wet and outdoor areas. RT M is a rectified matt finish. P.tech is a protective surface treatment.

## FORMATS

All sizes are given in centimetres, width first. The largest format in this catalogue is 160x320 cm; the smallest listelli run to 5x120 cm.

Not every colour is produced in every size of its collection. The spec bar lists the collection range; confirm the size per colour when ordering.

## THICKNESS

6 mm and 8,5 mm for walls and interior floors. 12 mm for slabs and worktops. 20 mm for the X20 outdoor paver, which can be laid dry.

## COLOUR ON THE PAGE

Swatches are photographed by the manufacturer and printed here at reduced size. Tone and vein vary between production batches. Always approve a physical sample before the order is placed.

## THE NINE EFFECTS

MARBLE EFFECT

# The quarry, *reproduced in porcelain*

Calacatta, Statuario, travertine, onyx and breccia patterns carried through full-body porcelain. Polished, soft and natural finishes change how the vein reads, so the same graphic can be used on a floor and on a feature wall without repeating itself.

# Double

FLAVIKER

The Double collection is inspired by Portland stone, a limestone conglomerate quarried on the eponymous island of the coast of Dorset. Widely used in architecture throughout the British Isles and in particular in many of London's historic buildings, the slabs can be either cross or vein cut to reveal two different yet complementary...

METAL EFFECT

## Oxide, bronze *and burnished steel*

Metallic surfaces with the depth of corten and burnished bronze. Used as a dark ground they carry light in a way that a flat paint finish cannot.

LARGEST FORMAT 120X250 CM (47 1/4" X 98 1/2")

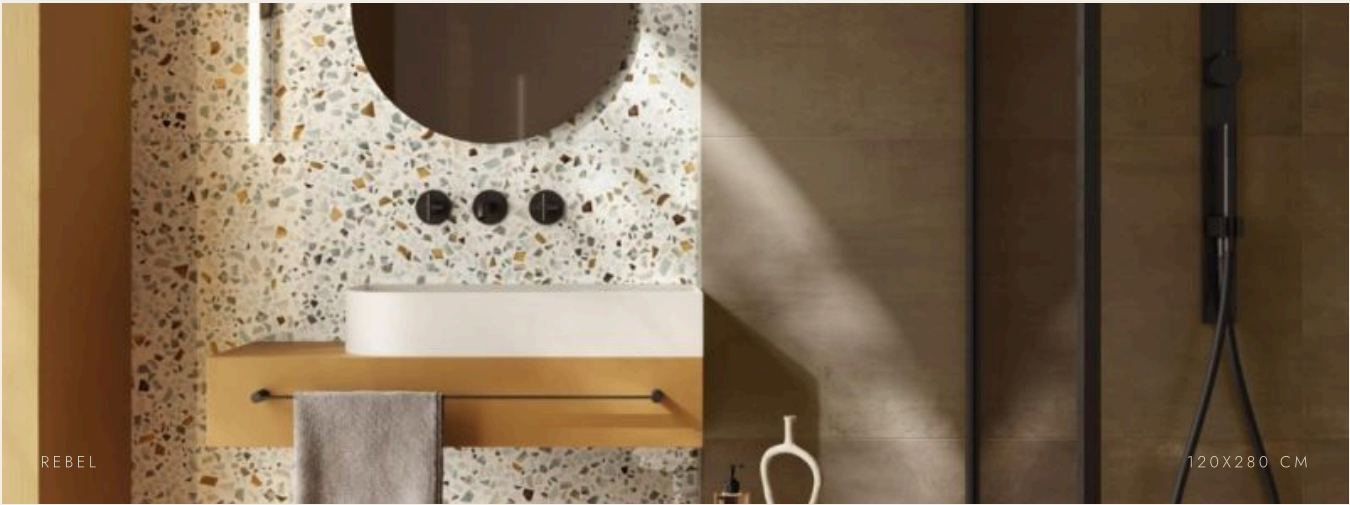

REF. 1

METAL EFFECT

# Rebel

FLAVIKER

The Rebel collection stands out for its visually striking surface with translucent effects and colour contrasts typical of wear, recreating the appeal of aged materials with stains and traces of rust.
